**In the Claims:**

Claims 1-9 (Canceled)

Claim 10 (Currently Amended): A recordable optical medium in which a record information can be recorded by a recording apparatus, the recordable optical medium comprising:

a reservation information area for storing a reservation information indicating a scheduled time for starting and stopping recording a television program on the recordable medium; and

a record information area for storing the television program recorded thereon based on the reservation information [a record information],

wherein the reservation information is an information copied from the recording apparatus [the record information is a television program and is recorded on the record information area based on the reservation information, and the reservation information indicates a scheduled time for recording the television program on the recordable medium].

Claim 11 (Previously Presented): The recordable medium according to claim 10, wherein the recordable medium comprises a disc-shaped type recording medium.

Claim 12 (Previously Presented): The recordable medium according to claim 11, wherein the reservation information area is located at an inner-circumferential portion of the record information area.

Claim 13 (Canceled)

Claim 14 (Currently Amended): A recordable optical medium in which a record information can be recorded by a recording apparatus, the recordable optical medium comprising:

a reservation information area for storing a reservation information indicating a channel information, a start time for recording, a stop time for recording and a recording date to record a television program on the recordable medium; and

a record information area for storing the television program recorded thereon based on the reservation information [a record information],

wherein the reservation information is an information copied from the recording apparatus [the record information is recorded on the record information area based on the reservation information, and the reservation information comprises at least a channel information, a start time for recording, a stop time for recording and a recording date to record a television program].

Claim 15 (Previously Presented): The recordable medium according to claim 14, wherein the reservation information further comprises a telerecording mode information.

Claim 16 (Previously Presented): The recordable medium according to claim 10, wherein a plurality of information pieces is recordable in the record information area.

Claim 17 (Currently Amended): A recordable optical medium in which a record information can be recorded by a recording apparatus, the recordable optical medium comprising:

a reservation information area on which a reservation information is copied from the recording apparatus [recorded] in advance; and

a record information area for storing the [a] record information,

wherein, at the time of recording operation, the record information, which is a television program, is recorded on the record information area based on the reservation information, the reservation information indicates [indicating] a scheduled time for starting and stopping recording a television program on the recordable medium [recording the television program on the recordable medium].

Claim 18 (Previously Presented): The recordable medium according to claim 17, wherein the recordable medium comprises a disc-shaped type recording medium.

Claim 19 (Previously Presented) The recordable medium according to claim 18, wherein the reservation information area is located at a inner-circumferential portion of the record information area.

Claim 20 (Canceled)

*Claim 21 (Currently Amended)* A recordable optical medium in which a record information can be recorded by a recording apparatus, the recordable optical medium comprising:

a reservation information area on which a reservation information is copied from the recording apparatus [recorded] in advance; and

a record information area for storing [the] [a] record information,

wherein, at the time of recording operation, the record information, which is a television program, is recorded on the record information area based on the reservation information, [and] the reservation information indicates [comprises at least] a channel information, a start time for recording, a stop time for recording and a recording date to record a television program on the recordable medium.

*Claim 22 (Previously Presented)* The recordable medium according to claim 21, wherein the reservation information further comprises a telerecording mode information.

*Claim 23 (Previously Presented)* The recordable medium according to claim 17, wherein a plurality of information pieces is recordable in the record information area.

*Claim 24 (Previously Presented)* The recordable medium according to claim 10, further comprising:

a history information recording area for storing a history information;

wherein the history information comprises a recording date and time and a recording position on the recordable medium.

Claim 25 (Previously Presented) The recordable medium according to claim 24, wherein the history information is recorded on the history information recording area when recording of the record information is finished.

Claim 26 (Previously Presented) The recordable medium according to claim 14, further comprising:

a history information recording area for storing a history information; wherein the history information comprises a recording date and time and a recording position on the recordable medium.

Claim 27 (Previously Presented) The recordable medium according to claim 26, wherein the history information is recorded on the history information recording area when recording of the record information is finished.

Claim 28 (Previously Presented) The recordable medium according to claim 17, further comprising:

a history information recording area for storing a history information; wherein the history information comprises a recording date and time and a recording position on the recordable medium.

*D1  
Claim 29*

Claim 29 (Previously Presented) The recordable medium according to claim 28,  
wherein the history information is recorded on the history information recording area  
when recording of the record information is finished.

Claim 30 (Previously Presented) The recordable medium according to claim 21,  
further comprising:

a history information recording area for storing a history information;  
wherein the history information comprises a recording date and time and a  
recording position on the recordable medium.

Claim 31 (Previously Presented) The recordable medium according to claim 30,  
wherein the history information is recorded on the history information recording area  
when recording of the record information is finished.
